FILE PLAN

1.11

March 14, 1989; 11:08 am - I continued my call with Sue Kennedy at E&E to let her know that I had located the aerial photo of the Richardson Flat area. I was also sending along the Werner Raab marked up version of the UPCM comments on the HRS listing.

Sue noted that there would be several groups of E&E people heading for the SLC area in late March/early April. She thought the best time to try to schedule something would be between April 1 (a Saturday) and April 4 (Tuesday). Unless, of course, we would want to insist that the inspection occur over Easter weekend. I said that 4/1-5 sounded ok to me.

Sandra M: please check with R Beless to make sure the dates are ok for UPCM. I promised E Osika lots of lead time for this vist.
